## Objective

---

As a passionate and adaptable Full Stack Developer, my aim is to leverage my technical expertise and strong soft skills to create innovative and user-centric web applications. With a foundation in both front-end and back-end development, I aspire to contribute to a team where I can collaborate effectively, communicate ideas clearly, and problem-solve creatively. Seeking opportunities to learn and grow within a supportive and innovative team environment, contributing to the success of projects and making a positive impact on users.

## Education

---

**Rajiv Gandhi Prodyogiki Vishwavidyalaya, Bhopal**  
*Bachelors of Engineering in the Mechanical Branch*

**August 2016 – July 2020**  
*CGPA: 8.39/10*

**L.N College , Bhagwanpur, Vaishali, Bihar**  
*12th BSEB, Patna*

**April 2013 – June 2015**  
*Percentage: 68.8*

## Technical Skills

---

**Languages/Database:** Javascript, Java, MongoDB,

**Web Technologies:** HTML, CSS.

**Software & Tools:** VS code, Node.js, Express.js, Postman, MongoDB compass, Studio 3T, Firebase.

## Projects

---

### Ecommerce-API | [Git](#)

- **Disriptions** :- Creating API for E-commerce application. In this API, the User can add products, retrieve data from all products, and filter the product on the basis of the minimum price, maximum price, and category and also user can add Products to carts. Users can sign up and sign in to get a token for authorization
